

Evidence. Not Noise.

Independent cybersecurity advisory for critical
decisions.

INTARMOUR AT A GLANCE

One advisor. No hand-offs.

Intarmour is the structure through which Simone Nogara delivers senior advisory work: independent judgement, end-to-end accountability, and a selected network of specialists engaged only when an assignment calls for it.

15+

years of experience

1

dedicated advisor, end to end

Fixed price

agreed before work begins

100%

independent

- Supporting clients in Italian and international contexts.

WHEN TO INVOLVE US

When cyber risk enters the decision.

Not every problem needs more technology. Some need evidence, judgement and an independent view of the consequences.

M&A and investment

Risks that may affect price, warranties, integration and Day 1.

Incidents and continuity

Decisions under pressure, evidence to preserve and recovery ordered by business priority.

Boards and regulation

Accountability, controls, roadmaps and reporting that decision-makers can use.

Disputes and digital evidence

Forensic acquisition, chain of custody and defensible technical conclusions.

CAPABILITIES

Six areas of work.
One standard.

01 Cyber Due Diligence

Material risk, control validation, exposure and Day 1 planning for M&A and investment.

03 NIS2 & CRA Compliance

Scope, gaps and a prioritised plan the board can approve and fund.

05 Expert Witness & Digital Forensics

Forensic acquisition, analysis, technical reporting and support under scrutiny.

02 Critical Infrastructure & Gov Advisory

Operational security and Zero Trust for IT/OT, essential services and the defence supply chain.

04 Security Governance (vCISO)

Board-level direction, oversight and reporting on a proportionate retainer.

06 Incident Response

Readiness, coordination, containment, evidence preservation and board debriefing.

SECTORS

Context before template.

The obligations, threats and stakes differ by sector. So does the approach.

/ Payments & financial services

trust, DORA, third parties and continuity

/ Law firms

privilege, BEC and digital evidence

/ Luxury & manufacturing

IP, OT, supply chain and operations

/ Professional firms

proportionate senior direction

/ Public sector & defence

essential services, accountability and resilience

/ Professionals & micro-business

a sustainable path to security done properly

/ Retail & e-commerce

payments, customer data and always-on operations

HOW WE WORK

Deliberate, evidence-led and easy to leave.

Most engagements begin small. The price is agreed before before work starts, and everything we produce remains yours.

Confidential briefing

30 minutes

Context, obligations and constraints. A straight answer on whether and how we can help.

Fixed-price assessment

2-3 weeks

A focused review, a board-ready report and a prioritised roadmap.

Ongoing oversight

when needed

Security direction and reporting on a monthly retainer, sized to the company.

● Price before we start

● You own the output

● Independence, always

● Proportionate by design

OUTPUT

Not a report to archive. Work you can act on.

Every deliverable should clarify what is known, what remains uncertain, which risks are material and which decisions require attention.

DELIVERABLE

- | | | |
|----|--------------------------|---|
| 01 | A view of material risk | Separated from technical noise. |
| 02 | Evidence and limitations | Traceable conclusions with assumptions
assumptions stated. |
| 03 | Priorities and roadmap | Actions ordered by risk, impact and
timing. |
| 04 | Decision briefing | Language usable by boards, investors and
legal teams. |
| 05 | Reusable documentation | Reports, roadmaps and evidence remain
with the client. |

SELECTED ENGAGEMENTS

Three anonymised examples.

The examples show the type of decision supported, not a standard model to repeat.

FINTECH TARGET

Buy-side Cyber Due Diligence

A review of payment architecture, access, data and critical providers. Material exposures became negotiation inputs and a Day 1 roadmap.

Anonymised engagement

FINANCIAL INSTITUTION

DORA readiness

Gaps in ICT risk, incident reporting and critical providers providers were turned into registers, processes and an and an operational resilience-testing cycle.

Anonymised engagement

COMMERCIAL DISPUTE

Digital Forensics & Expert Witness

Forensic acquisition, chain of custody, timeline reconstruction and a technical report a judge could follow and an opposing expert could reproduce.

Anonymised engagement

One line of accountability, end to end.

Simone Nogara

Founder & Principal Advisor

Simone founded Intarmour to deliver senior advisory work independently and answerable to one person. His path combines computer engineering and legal sciences focused on criminology, investigation and security - the same combination that underpins evidence-based advisory, digital forensics and expert-witness work.

- Senior by default
- No junior hand-offs
- Selected independent specialists engaged per assignment

BOUNDARIES

What we do.
And what we do not.

WE DO

Independent advisory Analysis, judgement and decision support.

Evidence before assumption Verifiable findings and stated limitations.

Proportionate support A focused project or ongoing oversight when needed.

WE DO NOT

- | | |
|---|--|
| ✗ We do not sell hardware, software or managed services. | ✗ We do not provide body rental or staff augmentation. |
| ✗ We do not accept engagements with a conflict of interest. | ✗ We do not create dependency on a technology or vendor. |

NEXT STEP

Let's discuss the decision in front of you.

A confidential conversation to clarify the context, objectives,
constraints and the level of work genuinely required.
